Customer's needs

• **Global business need:**
  - deliver faster, better quality apps
  - Agile succeeds 3 x more often than traditional development processes

• **Need to improve users’ experience & productivity**
  - Enable product owners to plan releases easier
  - Enable developers to access Tuleap agile tools directly from their IDE, avoiding switching from tool to tool
Enalean & Obeo solutions

- **Technical solution:**
  - Enhance the UI of Tuleap agile tools
  - Develop a REST API
  - Make the developments to integrate Tuleap agile tools into Eclipse using the REST API
An Agile partnership

Partnership based on Enalean’s strategy and core values

The first Open Source Agile Planner, by and for Agile Teams
An Efficient partnership

- Start of the project: October 2013
- Final release: July 2014
- Delivery time: 9 months
Final delivery: Tuleap Agile Planner for Eclipse

Up to now, connectors for agile management integrated into Eclipse were **proprietary**.

**First ADLM to provide an Agile Planner connector for Eclipse in Open Source**, (entirely contributed in open source, Eclipse Public Licence - EPL)
Get Tuleap Agile Planner for Eclipse

- Install the latest version of Tuleap
  [http://tuleap.net](http://tuleap.net)

- Update your Eclipse to 4.3 Kepler

- Download *Tuleap Agile Planner* on the EclipseMarketPlace

  or Get it via the Mylyn Discovery UI

- Enjoy!
